</HEAD>
<BODY>

<H1> FORM ACTION PHP PAGE </H1>
Demonstrates:
<ul>
<li>
php include file to do connection
<li>
call stored procedure with error handling to insert data.
<li>
Get error back from stored procedure and conditionally print
<li>
query DB and print results to allow user to validate data entry
</ul>

<p>
<?php
    // include files:
    // connection function
    include('connect.php');

    // get variables from form
    // Student ID, Name, and up to 4 valid courses from
newStudentForm.html
